### About Me

Hello! My name is Yuri, I'm from Moscow. I've been interested in IT for a long time but didn't dare to take the first step. Now I'm actively learning React + TypeScript, diving deep into these technologies. I also have experience with Python, Node.js and PHP. My journey into web development started in 2020 with courses, after which I continued to learn on my own while working as a goods receiver from China and Arab countries. Now I'm ready to fully immerse myself in IT and start my career in this field. Thank you for your attention! Have a nice day!

### Skills

### Additional

- React Hooks
- Gulp
- jQuery
- Webpack
